Canadian Solar 400W Solar Panel is an all-black high density mono PERC module, which offers great power output. The module shows an efficiency of up to 19.9%, which is achieved due to higher light absorption and reduced energy loss in cable. Canadian Solar CS1Y-400MS is an ideal solution for residential rooftop installations.

The wattage of one solar panel ranges from 250 to 400 W. Multiplying that with average peak sun hours will give you the daily Wh output of a single panel. For instance, if a 300 W solar panel receives 6 hours of peak sunlight daily, its maximum theoretical output is 360 Wh of power every day.
