575w monocrystalline silicon photovoltaic panel

Both monocrystalline and polycrystalline solar panels serve the same function, and the science behind them is simple: they capture energy from the sun (solar energy) and turn it into electricity. They're both made from silicon; many solar panel manufacturers produce monocrystalline and polycrystalline panels.

Monocrystalline Silicon Solar Panel Wattage. Mostly residential mono-panels produce between 250W and 400W. A 60-cell mono-panel produces 310W-350W on average. Due to their single-crystal construction, monocrystalline panels have the highest power capacity.
