

Announcement of the list of photovoltaic enterprises on the Growth Enterprise Market

Who will dominate the global PV module market in 2023?

A total of 18 Chinese companies were selected in the top 20 list, with a total output of more than 440GW in 2023, gradually taking over the global PV module market with their unique advantages. LONGi, the king of the PV industry, will supply 66.44GW of modules in 2023, up 42% year on year.

How pvbl ranked the top 20 global photovoltaic inverter brands in 2023?

On the first day of the conference, PVBL's annual ranking of the Top 20 Global Photovoltaic Inverter Brands was announced. Preferential policies promoted the inverter market growth in 2023. Most of the major inverter companies won a large amount of orders and expanded their capacity with high shipment volume.

What is a snapshot of global PV markets?

This 12th edition of the "Snapshot of Global PV Markets" aims at providing preliminary information on how the PV market developed in 2023. The 29th edition of the PVPS complete "Trends in Photovoltaic Applications" report will be published in Q4 2024.

How much does photovoltaics contribute to the world's electricity demand?

In total, PV contribution amounts to over 8% of the electricity demand in the world. Public policies with regards to photovoltaics tend to change as governments seek to promote solar or react to changing costs to investors or even state aid programs.

How many PV companies are in China?

China has a total of 133 companies on this year's list. Among them, Tongwei Group, with its robust manufacturing capabilities, has once again secured its place on the Fortune Global 500 list, filling the gap for Sichuan province's manufacturing sector in this ranking and becoming the first PV enterprise globally to achieve this feat.

How many GW of PV systems will be installed in 2024?

The 29th edition of the PVPS complete "Trends in Photovoltaic Applications" report will be published in Q4 2024. It appears that 1 581 GW represents the minimum installed cumulative capacity by the end of 2023, and at least 407.3 GW but perhaps as much as 446 GW³ of PV systems have been commissioned in the world last year.
