

# Average domestic energy storage price per 30kW in Switzerland

Why are energy prices important in Switzerland?

Swiss Federal Office of... energiedashboard.ch:... Energy prices on the markets are an important indicator of the current market and supply situation in Europe and Switzerland. Supply (production) is combined here with demand (consumption) and ultimately results in a price for a specific energy product. There are markets for different products.

How much does electricity cost in Switzerland?

Accordingly, the average electricity costs in Switzerland between CHF 17 and CHF 140 per month. Based on the Example of a tumble dryer Let's take a closer look at how you can calculate your electricity costs.
