

# Average utility scale ESS price per 20kWh in Egypt

Are Egypt's Electricity tariffs a burden on household budgets & businesses?

Others may be concerned about the potential burden on household budgets and businesses. Egypt's Ministry of Electricity announced a 16% to 26% increase in electricity tariffs starting January 2nd, marking the latest step in the government's gradual removal of power subsidies.

How much PT/kWh in Cairo & Alexandria governorates?

0.2 Pt/kWh up to 45 kWh for Residential in Cairo and Alexandria governorates, 0.1 Pt/kWh in the rest of the governorates. (2) The tariff is set based on the foreign currency exchange rates published on the official website of the Central Bank of Egypt, and will be reviewed upon any changes to the exchange rates.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW /4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

When will Egypt's Electricity tariffs increase?

Egypt's Ministry of Electricity announced a 16% to 26% increase in electricity tariffs starting January 2nd, marking the latest step in the government's gradual removal of power subsidies. The move, reflected in February's electricity bills, comes after a three-year delay in the government's initial plan to fully eliminate subsidies by July 2022.

How much will electricity prices increase under new regulations?

Under the new regulations, the increase in electricity prices will range from 14.45% to 50%, depending on household electricity consumption. For prepaid meter users, the price hike took effect this past Saturday, while those with regular meters will face the new rates starting from October 1.

What is the new electricity price hike based on?

The move, reflected in February's electricity bills, comes after a three-year delay in the government's initial plan to fully eliminate subsidies by July 2022. As before, the price hike is tiered based on household consumption. The revised pricing structure for households is as follows:

The scale of your commercial & industrial battery energy storage system also plays a crucial role in determining the cost per kWh. Larger systems generally benefit from ...

The national laboratory provided the analysis in its "Cost Projections for Utility-Scale Battery Storage: 2023 Update", which forecasts how BESS capex costs are to change ...
