Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.

How much does a solar PV system cost?

The average cost of a typical 3.5kW solar PV system is currently around £6,000, roughly 10% of which pays for professional installation. To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself.

How much does a DIY solar system cost?

If you're just dipping a toe into solar via the DIY route, start with one off-grid panel in a DIY solar kit that includes all the necessary cables, accessories and instructions, such as Renogy's 200W 12V General Off-Grid Solar Kit (currently just £230).

Are DIY solar panels legal in the UK?

Yes. UK law is pretty relaxed about DIY solar panels, and in most cases you don't even need planning permission to install a full-sized array of solar panels by yourself. But going DIY may mean you miss out on government schemes, product warranties and utility company support, because you won't have the necessary paperwork or certification.

Do you offer solar panels for sale in the UK?

Since 2010, our friendly UK team have helped tens of thousands of people install the right Solar PV system, and we are keen to support you today and offer PV solar panels for sale. PV Solar Panels generate emission-free, clean electricity every day of the year in the UK and can vastly reduce your energy bills.

Finding an unshaded spot is best, but sometimes shading is unavoidable. Some solar panel systems can minimise the impact of shading using "optimisers". Solar optimisers help improve the overall performance of your solar panel system. So, if one panel is shaded, it doesn't impact how much electricity the other panels can generate.
