

CEC Photovoltaic Panel After-sales Service

What is a CEC-approved solar panel?

The CEC or Clean Energy Council is a regulatory body that aims to promote quality solar panels, installers, and retailers and protect the consumer. In doing so, the CEC has approved a number of solar panels to help homeowners better navigate the solar energy market.

Who are CEC approved solar installers?

Besides solar panels, the Clean Energy Council (CEC) also endorses solar installers. CEC accredited installers conform to the solar industry best practices and install CEC approved solar PV modules. A CEC approved solar retailer is a reliable agent in the solar industry because they deal with CEC approved installers and solar panels.

Should you buy solar panels from a CEC accredited retailer?

Buying solar panels from accredited retailers and hiring CEC-approved solar installers decides the longevity and efficiency of your system. CEC-accredited installers and retailers are trained enough to design and install solar panels, inverters, and other renewable energy systems with greater efficiency.

Who are CEC-accredited solar installers & retailers?

CEC-accredited installers and retailers are trained enough to design and install solar panels, inverters, and other renewable energy systems with greater efficiency. You will find 8,000+ CEC-accredited solar retailers and installers across Australia, and Solar Power Nation is one of them.

Why should you choose CEC-accredited solar panels?

If you have decided to opt for solar panel system, you must know the CEC-accredited solar panels, retailers, and installers. In this guide, we will uncover the critical role of CEC in energy savings and independence. Our experts will also discuss why choosing CEC-approved installers is vital to get the best return on your investment.

What is the CEC code for?

The CEC Code is a voluntary certification for companies that sell solar photovoltaic PV systems. Clean Energy Council approved solar retailers don't conduct misleading advertisements or campaigns and are tasked with maintaining the solar industry's reputation through transparent business practices.

approved by the distribution network service provider (DNSP). 3.1.3 The system shall comply with the relevant electrical service and installation rules for the states or territory where the system is installed. The Network Service Provider (NSPs) may have additional requirements.
