How to choose a charging pile (bolt)?

The charging pile (bolt) should have a good shielding function against electromagnetic interference; (5) The bottom of the pile (bolt) body should be fixedly installed on a base not less than 200mm above the ground. The base area should not be larger than 500mm $\times$ 500mm; 3. Power requirements 4. Electrical requirements

How to choose a good AC charging pile?

The AC charging pile (bolt) should comply with IP54(outdoor), and be equipped with necessary rainproof and sunscreen devices; 7. Three defenses (anti-moisture, anti-mildew, anti-salt spray) protection The printed circuit boards, connectors and other circuits in the charger should be treated with anti-moisture, anti-mildew, and anti-salt spray.

Should I install a solar battery?

Installing a solar battery is a great way to maximise the benefits of your solar panels, as it stores the excess energy generated. Think of it as having a power bank for your home.
