Microgrids can serve an area as small as a single neighborhood, an apartment complex, or the campus of a hospital, business or university. But the same idea can also scale up to serve an entire city. A microgrid can also power just a key portion of its area, such as emergency services and government facilities.

These seven white papers constitute the DOE Microgrid Program Strategy. OE sponsored the DOE Microgrid R& D Strategy Symposium on July 27 to 28, 2022, to seek input and feedback on the seven white papers from broader microgrid stakeholders. The symposium featured presentations, panel discussions, and group
