What is generator repair & maintenance?

Our generator repair and maintenance services cover all types of generator issues, from minor faults to full-scale system breakdowns. With fast turnaround times and expert technicians, we ensure your generator is back online as soon as possible. Prevent costly outages by scheduling regular maintenance, or contact us for emergency repair services.

Can I repair my Generator myself?

If you do not want to repair the Generator yourself, we have a network of Repair Centres who would be happy to carry out the repair for you. (Please be aware they do NOT provide telephone or free advice. Please see our help centre for this.) Please find your local repair centre via the map below. View Generator Guru Repair Partners in Google Maps.

How do I troubleshoot a generator?

The first step in generator troubleshooting is to browse the Repair Clinic list of symptoms. Is your generator starting but not running smoothly? Perhaps it's belching plumes of white smoke. Once you've identified a symptom that looks familiar, we can show you the cause of the problem.

Why do I need a generator repair guide?

Because when you need your Generator, you need it working now! The guide will take you step-by-step to get it fixed fast! Includes troubleshooting and Generator repair instructions. If you need further help you will be given the opportunity in the Interactive Repair Guide to open a Support Ticket with our Engineering Team.

Generators require ongoing maintenance to continuously run properly, and they need to be repaired by a certified generator repair technician. Skip to content (239) 222-1672 Ft. Myers - Naples - Cape Coral - Lehigh Acres

4. Low Supply of Coolant. A sensor is automatically alerted when coolant levels are low, putting the generator in a "no start" mode. Since the function of the liquid is to distribute heat throughout the engine and maintain all components at a safe temperature to prevent overheating or freezing, running the generator when the coolant is running low might result in overheating.

The same thing happened to our Tefal Steam Generator (luckily whilst under warranty) so it is obviously a common fault. When we sent ours for repair via Comet, they lost it and eventually replaced it with a brand new one. (After some strong words regarding reasonable time etc). Hopefully Tefal will sort it out as it looks to be a design issue.
