

Great Wall Fengjun generator not charging

Why won't a generator charge the battery?

When a generator won't charge the battery, it's not always the generator's fault. Some factors that can prevent the battery from charging include: 1). The battery itself is the problem. Batteries have a limited lifespan and are not designed to remain in operation forever.

How to fix a generator not charging issue?

To fix a generator not charging issue, begin by identifying the source of the problem. Effective solutions include: 1). Replace the blown fuse in the transfer switch (if applicable).

Can a blown fuse affect a generator?

Blown fuses can affect a generator's ability to charge the battery. A generator can still supply power to your home even when some of the breakers have tripped, but people often overlook checking the breakers and fuses because the generator is still powering some of their devices.

What are the most common generator problems?

The most common generator problems are: Take caution when performing repairs. Always remove the spark plug wire and wait for the engine to cool. Follow all safety precautions found in the operator's manual. This post may include affiliate links. Purchases made through these links may provide a commission for us, at no extra cost to you.

Quote Reply Topic: Generator Not Showing A Charge Posted: 25 July 2014 at 10:03pm: I got my Willys out the other day for the first time this year...only run it in the summer. When I put it away last year everything seemed fine. I usually run a few checks and noticed the voltmeter showing only battery voltage across the battery terminals.
