3. Grade C solar cells. A Grade C solar cell has visible defects, and the electrical data are off-spec. All solar cells with defects worse than Grade B can be classified as Grade C. Or. A solar cell can be graded as C when the partly broken cell which could be cut into smaller pieces and re-used.

However, to model the PV panels comprehensively, it is necessary to determine other physical parameters, e.g., series resistance of PV cell (R_s), shunt resistance of PV cell (R_{sh}) and diode ideality factor (n). This paper presents a generalised mathematical model of a PV panel utilising only the quantities provided in manufacturer's datasheet.
