How many compartments does the intelligent high-voltage switch cabinet have?

The intelligent high-voltage [2]switch cabinet is divided into four independent compartments: bus room, instrument room, circuit breaker room and cable room. The protection grade of the cabinet is IP4X, as shown in Fig. 3. Intelligent high voltage switchgear diagram

What is a high voltage switch cabinet?

The traditional high voltage switch cabinet is mainly composed of isolation switch, earthing knife-switch, current transformer, surge arrester, vacuum circuit breaker, interlocking mechanism, live display, ammeter, signal indicator light, transfer switch, electromagnetic lock and cabinet body. The protection level of cabinet body is IP2X.

What is the monitoring content of intelligent high-voltage switchgear?

The monitoring content of the intelligent high-voltage switchgear includes partial discharge monitoring, ultrasonic wave, geoelectric wave and temperature sensor to collect corresponding data, and then transmit it to the intelligent data acquisition gateway through wired mode.

What happens if a high voltage switch is not repaired?

High-voltage switchgear will have insulation aging, mechanical failure, heating and other problems in long-term operation. If these faults are not repaired in time, they will often cause mis operation or refusal of operation of the switch, which will expand the fault. If the fault is serious, it will lead to a large area of power failure.
