Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How do you mount a solar panel?

Attach the Fixing Bracket to the Solar Panel's Mounting Hole Now that you've aligned them properly, attach the fixing bracket to the mounting hole of the solar panel. Repeat this process on the other side of your solar panel. Ensure the bolts' alignment are symmetrical and fix the mounting holes at the same level.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.
