

How can I force open the locker

How do you open a locker lock?

Now you can open the lock by pulling the shackle. If, after following the procedure, the locker lock still won't open, don't panic. Start over from the beginning with three spins to the right and "clear" the lock. If, after re-entering the right combination, the locker resists to open, it means that it could be jammed.

How do you open a locker with a friend?

Ask a friend to grab and pull the locker with you. Together, you might be able to pull the locker open with force. Have your friend push the door or keep their knee on it while you work the lock. If it still doesn't open, try having everyone pull the locker forward at the same time.

How do you open a school locker?

See Step 1 to begin learning how to open 99% of all standard school lockers. (Note: some locks may open differently) Spin the dial at least three times to the right (clockwise), all the way around. This clears the lock of any previous numbers. If at any point in putting in your combination you mess up, do this again to start over.

How do you fix a locked locker?

Start over from the beginning with three spins to the right and "clear" the lock. If, after re-entering the right combination, the locker resists to open, it means that it could be jammed. Try pushing and pulling a bit, sometimes this maneuver is enough to make it work. If not, just ask someone (a teacher, a friend or the janitor) for help.

Why can't I open a locker door?

If the lock is built into the locker, you'll now be able to open the door. If the lock doesn't open, try the following: Rotate the dial a couple more numbers to the right (clockwise). The gates in these cheap locks are not always aligned correctly. Clear the lock and try entering the numbers again.

How do you open a locker with a knee?

This may be awkward, but using your knee, place it about three quarters of the way up from the bottom and apply pressure. Press hard and once again repeat the opening sequence. Now dial the combination or use the key to unlock the locker. Once you pull the latch/opening mechanism up, release the pressure your knee is placing onto the door.
