Mount the fuse box and charge controller on the support wall, then connect them. Install the inverter on the support wall. Connect it to the fuse box and charge the controller to complete the electrical setup. Step 2: Work on the solar panel connections. Secure at least two parallel solar panel support rails onto the shed roof.

Secure your corner and end posts with cement. Having purchased a solar-powered electric fence best-suited to your needs, it's time to lay the boundary around which the fence shall run. If you're keeping foxes out of a chicken coop, the the boundary is going to be the chicken run; similarly, if you're keeping horses in a field, the boundary is the perimeter of the field.
