

# How to fix the solar bracket on the building

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

What type of fixing system is used for solar PV panels?

The type of fixing system used will depend on whether the solar PV panels are going to be: ground mounted. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and clamps.

Can solar panels be installed on a slate roof?

Solar panels can be installed on slate roofs, which are very flat. When fitting solar panels to slate roofs, the fixing bracket used will typically take the solar panel very close to the roof to achieve a nice low-profile appearance.

Can solar panels be mounted on a roof?

Naked have seen it all before and can help you find the perfect Solar mounting system to get your solar panels where you want them. We've all seen Solar PV panels mounted on people's roofs and on the roofs of businesses, so here's a rundown of the options to get them up there. By far the most common method for fixing Solar PV panels to a roof.

How do solar panels mount?

The mounting rails are fixed to the roof anchors using a locking system and the panels are then fixed to the mounting rails using clamps. Most makes of solar panel have their own clamping system. The type of roof anchor needed will depend on the existing roof tiles, and the height and spacing of the roof battens.

Can solar panels be mechanically fixed to a flat roof?

When you specify a photovoltaic array for your flat roof, there is the option of either mechanically fixing the array, or alternatively using ballast to weigh it down without fixing into the structure. In this article we will look at the options for mechanically fixing solar panels to a flat roof and make the case for an engineered solution.
