Not every solar panel, inverter, and battery is created equal. For example, certain panels and inverters are better suited for roofs with occasional shading than others. And if you're relying on your solar system to reduce your electricity costs, it's important to invest in the right technology.

The photovoltaic material is the part of the CdTe thin-film solar panel that converts solar radiation into DC energy. This is manufactured by creating a p-n heterojunction, this semiconductor requires the deposition of a layer of CdTe for the p-doped section and one of CdS or MZO for the n-doped section.

Get a ring door bell and when they ring it, answer through the app and tell them you're not interested or you rent. As for me, I answer the door and just stick my head thru and by the time they get the second word out, I'm asking what can I do for you, then they start in with what they want and I simply say no thanks and slam the door in their faces.
