

How to pay tax on solar panel electricity generation

Do I have to pay income tax if I generate electricity?

Where the generation tariff is received by an individual, other than in a business capacity, and it is not chargeable as miscellaneous income, no Income Tax liability will arise. This will usually be the case where an individual generates electricity mainly for use in their own home.

How much do solar panels cost if you don't own a battery?

Each supplier has set rates for the electricity you export, but the highest you can get if you don't own a solar battery is E.ON's Next Export Exclusive tariff at 16.5p per kilowatt hour (kWh). On this tariff, the average solar panel owner will make around £219 a year from exporting their excess electricity back to the grid.

Will new solar homes get a payment from suppliers?

New solar homes and businesses creating and exporting electricity to the grid will be guaranteed a payment from suppliers under new laws to be introduced by the government this week (Monday 10 June).

Do solar installations qualify for HMRC tax relief?

HMRC regard solar installations as a long-life asset, which sometimes reduces relief. However, the installations do qualify for 100% Annual Investment Allowance (which is available for up to £1,000,000 of total qualifying expenditure by most standalone farming sole traders, partnerships or companies in the year ending 31 March 2023).

What are the tax rules for electricity installation?

There are two different sets of tax rules, depending principally on whether the installation is domestic or commercial. The contract documentation will state the type of installation. A domestic installation is normally mounted on the farmhouse roof (occasionally in the garden) and provides electricity solely to the dwelling.

What information is included in a solar panel tax report?

The report also gives some information relating to VAT on solar panels and Feed-in Tariff. Important notice: The above report is given as generally and publically available information not as tax advice.

The Feed-in Tariffs (FITs) scheme was introduced on 1 April 2010, under powers in the Energy Act 2008. There are three financial benefits from FITs: Generation tariff ...
