“Welcome to our channel! In this video, we dive deep into the world of solar panels, teaching you how to verify the authenticity of your solar panels and acc...

The first two measurements use the solar panel on its own. When disconnecting the solar panel, regulator and battery, take care to disconnect the panel from the regulator first, and then disconnect the regulator from the battery. When reconnecting, connect the regulator to the battery first, and then connect to the solar panel.

Disconnect the solar panel completely from the battery and regulator. Angle the solar panel towards the sun. Measure the voltage between the +ve and -ve terminals by connecting the negative contact from the voltmeter to the negative on the panel and the positive contact on the voltmeter to the positive on the panel.
