Image source: Origis Energy. The residential solar explosion. Photovoltaics in general have seen a meteoric rise, with exponential growth year on year. The residential uptake has been slower, but in 2017, 16.5% of Australian roofs have been equipped with solar panels and there is no sign of a slowdown. The rapid uptake isn't hard to explain - a 67% drop in costs since 2011 and ...

One major trend is merging the energy storage system with modular electronics, resulting in fully controlled modular, reconfigurable storage, also known as modular multilevel energy storage. These systems break the conventionally hard-wired and rigid storage systems into multiple smaller modules and integrate them with electronic circuits to obtain a modular ...
