

# Is it good to install photovoltaic panels Zhihu recommendation

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Do solar panels add value if you move?

However, adding a solar system can still benefit you financially if you move. According to a few studies, solar panels increase your home's value by about 4%. Just be wary of leasing solar panels if you think you might move. Leases are typically long-term and can be difficult to cancel, making it more challenging to sell your home.

How do I choose a solar panel?

Find out more about types of solar panels and other buying advice for solar panels. To help decide which type of solar cells to go for, look at cost per watt ( $\$/W$ ) of power output. You can do this by dividing the total cost of the solar system you are being quoted for by the total power output of the system.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Does a solar thermal panel need a primary heating system?

The thermal portion of a PV-T panel doesn't reach as high temperatures as an independent solar thermal panel, so you'll still need a primary heating system. Solar panels are typically fitted on top of your existing roof, but you can also choose solar tiles and slates, which blend in better.

Should I install a solar system if I don't own my property?

Renters or business owners who do not own their property should speak to the owner before making any plans to install a solar system. The higher your electricity rate, the faster your solar panel system will save you money.

Sources and references: 1 Finance is subject to eligibility, terms and a  $\$500$  deposit. 0% APR fixed over 36 months.. 2 These annual energy savings are dependent on your property type and location, roof type, slope, and size. If your roof is shaded or isn't south facing, figures are likely to be lower. We based the figure on the following: a) You have 12 (430W) ...
