

How do I repair a solar inverter?

To repair a solar inverter, first, you need to diagnose the problem, which is often indicated by the error code displayed on your inverter's LCD screen. Once the issue is identified, refer to the inverter's manual or consult the manufacturer's technical support.

Can a Canadian Solar inverter be maintained on-site?

On-site maintenance is not allowed. Never open the cover of the inverter, and never arbitrarily replace any internal components. For any maintenance need, please contact Canadian Solar. Otherwise, Canadian Solar shall not be held liable for any damage caused.

How do I install a solar inverter?

The inverter must be installed according to the correct technical specifications. To startup the inverter, the Grid Main Switch (AC) must be switched on, before the solar panel's DC solar switched on. To stop the inverter, the Grid Supply Main Switch (AC) must be switched off before the solar panel's DC isolator switched off.

What are the statuses of a PV inverter?

Normally there will be three statuses during the operation (refer to the LED indications):
Waiting: Conditions: The initial DC voltage of the PV strings is greater than the Min. DC input voltage, but is lower than the DC start-up input voltage. Inverter cannot start-up normally and cannot feed power into utility grid either.

Why do solar inverters display different error codes?

For instance, a string inverter, the most common type among residential solar systems, may display different error codes compared to the advanced micro-inverters. Overheating is a frequent cause of solar inverter issues, and one I've often encountered in my 20 years of experience in solar energy.

Can a solar inverter be serviced?

Inverter contains no customer serviceable parts inside. Please contact local authorized personnel if any service work is required. On-site maintenance is not allowed. Never open the cover of the inverter, and never arbitrarily replace any internal components. For any maintenance need, please contact Canadian Solar.
