

Latest news from Fengye Power Station

Where is Fengning pumped storage power station located?

The Fengning Pumped Storage Power Station in Hebei province, north of Beijing, started commercial operations Sunday on its twelfth and final reversible turbine unit. The facility is operated by the State Grid Corporation of China (SGCC).

How does Fengning work?

Fengning surpasses the Bath County project in the US as the world's largest pumped hydro station. During times of excess power, pumps are used to push water to reservoirs uphill. When more energy is required, gravity pulls the water back down through a turbine that generates electricity.

When will Gezhouba power station be built?

Originally scheduled for completion in 2021, construction on the project began in June 2013. In April 2014, Gezhouba Group was awarded the main contract to build the power station, which was constructed in two 1,800 MW phases, amounting to 3.6 GW of installed capacity.

How many MVA can a generator supply for PSPP Fengning 2?

In 2017, ANDRITZ Hydro received a contract from the state-owned Chinese energy utility company Fengning Pump Storage Co. Ltd. and State Grid Xinyuan Co. Ltd. to supply two variable speed generators for PSPP Fengning 2. The units have a nominal capacity of 330 MVA in generator mode and 345 MVA in pump mode.

The Drax Power Station, near Selby in North Yorkshire, is a converted coal plant which burns wood pellets. In 2023, it produced about 5% of the UK's electricity.
