The tilting brackets also allow the panels to ride over any roof vents that are likely to be in the way. In an ideal world the very best configuration is to have the panels mounted along the centre of the roof in a row that way they do not shade each other, they look right and are easy to get by for those who work off the roof a lot.

Finding the right brackets for solar panels can be a challenge, particularly when considering roof type.. Using the wrong bracket can lead to a subpar installation, which is unacceptable.. Slate roofs require sturdy brackets, metal roofs demand corrosion-resistant ones, and older roofs need specialised brackets that can handle worn-out surfaces.
