How much power does the advanced solar generator produce?

The Advanced Solar Generator only produces full power during a clear day. It produces no power during night time, and only 20% of what it would otherwise during a rain. By default the Advanced Solar Generator produces 300 J/t in direct sunlight, and can output a maximum of 600 J/t. This amount can be changed inside of the Mekanism Config.

How much power does a solar generator output?

While active, it will output 1200 J/sec (60 J/t) through the bottom of the panel base. It has a small 96 kJ internal power buffer. This Solar Generator's low output limits its usefulness, but that isn't the case with its larger cousin, the Advanced Solar Generator.

What is a solar generator?

This page is about the Solar Generator added by Mekanism. For other uses, see Solar Generator. The Solar Generator is a generator added by Mekanism. It produces approximately 18 RF/t, 46.54 J/t, 4.65 EU/t or 19 T/t during daylight hours and a very small amount when it is raining.

How does a solar generator work?

The Solar Generator harnesses sunlight to create power. The generator is particularly useful for generating passive energy for above-ground machines instead of draining your main stores. While active, it will output 1200 J/sec (60 J/t) through the bottom of the panel base. It has a small 96 kJ internal power buffer.

How to build an advanced solar generator?

Construction of an Advanced Solar Generator requires four Solar Generators, but it produces six times the power of its smaller counterpart. It also requires an area of 3x3x3 Blocks in order to be placed. Universal Cable or other compatible wire can be connected to the side of the base with a green square or the bottom of the Generator.

What is an advanced solar generator?

The Advanced Solar Generator is a highly upgraded version of the basic Solar Generator. Construction of an Advanced Solar Generator requires four Solar Generators, but it produces six times the power of its smaller counterpart. It also requires an area of 3x3x3 Blocks in order to be placed.
