There are usually four parts to most solar-powered outdoor lights - solar panel, battery, charge controller and load (such as a light bulb). A solar panel produces electricity from the sun and charges up a battery. The battery is used to power electrical things like light bulbs.

Outdoor solar lighting is powered by photovoltaic solar sensors that collect solar energy during the day and store it in internal batteries ready for use at night. Our solar-powered LED lights have photoresistors that allow the solar LED lights to detect low external light levels - this ensures they conserve power and only turn on when needed as the sun goes down.
