Usable PV modules must be provisioned with double insulated lead wire per UL4703, or marked as "PV wire" per NEC & locking connectors Cannot support panels requiring grounding, e.g., some Thin Film Technologies Isolated Inverters support all PV module types Weight -TL Inverters have no heavy transformer and weigh much less than

A PV inverter test setup as depicted by Chroma Systems Solutions Inc. PV inverters that tie into the grid now must meet rigorous standards such as IEEE 1547/IEC 61000-3-15/IEC 62116 that ensure on-grid products won't cause problems or safety issues. The usual approach in testing is to tie the PV inverter to a regenerative grid simulator that provides a four-quadrant, ...
