Depending on the type of solar panel (60 cells / 72 cells), the load capacity will vary. 60-cell panels allow for a load capacity of about 400 panels, that is, about 12-13 pallets depending on the size of the solar panels that will be transported. 72-cell panels allow for a load capacity of about 290 panels, that is, about 9-10 pallets of solar panels.

In this way, the shell of the solar panels is completely unfolded. After the rail system and the conveyor unit have been installed, the container is practically no longer visible once the fully wired module frames have been extended. This property makes it possible for the container not to cast a shadow on the mobile photovoltaic system.
