est minimum and ensure optimum operation of solar PV systems, there is the need for proper installation of solar PV systems and the adoption of effective operation and maintenance (O& M) strategies. Properly installed solar PV system with proper O& M has proved to provide better productivity with an expected lifetime of more than 25 years whereas

Solar panel maintenance: this refers to technical maintenance carried out by a professional and should ideally take place once a year. The reason why photovoltaic panels must be cleaned is to ensure solar panel efficiency. An unclean panel runs the risk of producing less electricity and thereby reducing the profitability of the installation.
