Elevation - the optimal elevation for a photovoltaic installation is 40°; from horizontal. This has been calculated to give you the maximum exposure during all seasons i.e. the low sun in winter and the high sun in summer. Most standard ...

Adding solar panels to your home reduces your reliance on electricity bought from energy companies. It can reduce your electricity bills and you might even earn money by selling the excess back into the grid. But with the average system costing around R7,000 to install, the initial outlay is not cheap.

Finding an unshaded spot is best, but sometimes shading is unavoidable. Some solar panel systems can minimise the impact of shading using "optimisers". Solar optimisers help improve the overall performance of your solar panel system. So, if one panel is shaded, it doesn't impact how much electricity the other panels can generate.
