

Photovoltaic panels lease land

Should landlords lease land for solar farms?

With the reduced cost of solar panels and high performance of rental incomes, solar farms offer some great benefits for landlords. This article looks at the various benefits for landlords considering leasing land for solar farms and gives an overview of the current solar energy market.

What are solar panel leases & how do they work?

For obvious reasons, solar panel leases will grant the tenant a right of free, uninterrupted and unobstructed passage of light to the solar panels. As a result, the landowner cannot do anything on the land or its adjoining land that would restrict the light flow to the solar panels.

How much does a solar farm land lease cost?

With solar farm land lease rents ranging from £850-£1100 (depending on variables such as development size and location) per acre per annum, rental rates compare favourably with other income streams such as agricultural and livestock farming, event hosting and storage services.

How does solar land lease work?

Land rental is paid per acre and compares favourably with other uses (including agricultural leasing). Solar land lease revenue streams provide financial certainty and can play a vital role in ensuring families maintain ownership of their farms and estates into the future.

What is a solar farm land lease program?

Solar Farm Land Lease Programs offer an opportunity for farmers, estate owners and other landowners to diversify their income streams and realise the potential of land that may otherwise be left overgrown or redundant.
