Here's how solar power systems work: 1. Light hits the solar panel. 2. The panel's PV cells absorb the energy from the sunlight. 3. The energy creates electrical charges that cause electricity to flow. 4. The current flows into an inverter, which converts it to AC electricity. 5. The current is fed through a meter and into your home's consumer unit.

A personalised approach, strong relationships with Tier 1 manufacturers, a specialised solar PV design tool,

Photovoltaic panels solar energy wholesale factory

and a bespoke B2B e-commerce platform lie at the core of our success, making us the ultimate destination for all things solar ...
