Are non-price criteria effective in solar PV auctions?

The European Solar PV Industry Alliance (ESIA) has published its recommendations for an effective and practical implementation of non-price criteria (NPCs) for resilience and ESG in solar PV auctions.

Can EU member states apply non-price criteria in solar pv'resilience auctions'?

For an EU regulatory environment that allows Member States to apply non price criteriain specific solar PV 'resilience auctions','resilient renewable energy support schemes' (consumers),and 'resilience procurement.' "SolarPower Europe warmly welcomes the new ESIA paper on bonus points and non-price criteria.

How many homes will be powered by the 6th renewables auction?

Sixth renewables auction delivers record smashing 131 clean energy projects powering equivalent of 11 million homes. Millions of homes and businesses across Britain will be powered by a new supply of clean,cheap,homegrown energy as a record number of projects receive funding through the government's most successful renewables auction to date.

What does smart industrial policy for solar PV look like?

This is what smart industrial policy for solar PV looks like. It gives clear offtake visibility for EU solar manufacturers while avoiding complexity and bureaucracy for EU solar developers that would impact the accelerating pace of cost-effective solar PV developments.

What's new in Solarpower Europe's ESIA paper?

"SolarPower Europe warmly welcomes the new ESIA paper on bonus points and non-price criteria. The paper lays out in detail how to set up targeted resilience auctions,starting with a small part of the market and leaving other auctions free of non-price criteria.

What is the res auctions platform?

The RES Auctions Platform is a deliverable of the EC Communication Wind Power Action Plan(COM (2023) 669 final). The platform consolidates the main information from Member States on planned renewable energy auctions in the EU.

The fourth source corresponds to the monthly market values for solar power, 8 which are an integral component of the calculation of bid values (see eq. (7 ) below).

The increased allocation to the solar power sector, including the promotion of the rooftop solar scheme, will aid the renewable capacity addition in the country. Further, the measures to promote the availability of critical minerals are expected to support the development of battery energy storage projects and reduce the cost of storage in the long run.

Find here the details for each renewable energy auction including their timing and frequency, expected deployment volumes, eligible technologies and other relevant information.

Since the results announcement, both R.Power and ReneSola Power have announced successful bids, with the former securing a portfolio with a total capacity of as much as 299MWp and the latter ...

The auction was the second of its kind to be run by the country's Department of Energy. Image: Solar Philippines. The Philippines Department of Energy (DOE) has awarded 1.96GW of solar PV ...

The British government has allocated £285 million for the new auction round and has included solar and onshore wind among the competing energy sources for the first ...

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.

Recent government announcements signal uncertainty or potential delays related to future RE procurement  
Recent auction was perceived by the private sector as one of the last chances for PPAs with EGAT  
Unclear when new opportunities may arise for ...

The Italian solar PV sector generated 30.6TWh of electricity in 2023. Image: the Emeren Group. Italy's energy management agency Gestore dei Servizi Energetici (GSE) has awarded 327.7MW of solar ...

The European Commission's Directorate-General for Energy published an online statement on Friday trumpeting the news that the organization's first cross-border solar ...

When we add up the numbers, the seller stands to pocket an additional \$33,190 via EnergyBin as opposed to an auction site. Plus, the \$1,500 membership covers twelve months" of access, meaning any additional equipment sold on EnergyBin during that timeframe is included in the fixed rate of \$1,500, and the seller receives all the other membership benefits ...

Solar has secured more than 2.2GW at a price of \$45.99/MWh in the latest Contracts for Difference (CfD) auction. In total 66 solar projects - more than all of the other ...

Bulgaria has started a public consultation on the country's first renewable auction, with an available capacity of 570MW for wind and solar. ... According to an announcement made by Bulgaria's ...

Many respondents to the consultation echoed the Solar Trade Association (STA)'s call for more frequent auctions to accommodate solar PV's shorter project development timeframes, and appealed for certainty that Pot 1 technologies (of which solar PV is one) would be eligible to compete in future allocation rounds, stating

that these could aid economic recovery ...

The Energy Commission of Malaysia (EC) has released the list of winning developers in its second Large-Scale Solar (LSS) tender round, offering roughly 563MWac of capacity.

These NPCs would apply under the upcoming EU Net Zero Industry Act, in specific public procurement or public auctions, and within industrial, commercial and ...

Germany received bids for 4.1GW of new solar capacity in its latest auction. Image: Obton. The German Federal Network Agency (Bundesnetzagentur) has announced the winners of the government's ...

The European Commission (EC) has proposed the European Solar Charter (ESC) in response to the challenges facing the continent's solar manufacturing industry. The document sets out a series of ...

Solar PV was the most widely auctioned technology. Nearly half of all solar PV auctions took place in South and East Asia and the Pacific, with most of the balance occurring in Europe. Solar PV is becoming competitive with traditional energy sources in these regions owing to large endowments of solar resources and the falling cost of technology.

This auction has produced a record number of solar projects bolstering our mission for a solar revolution, we have powered forward with onshore wind, secured the ...

In the 12th renewable energy auction concluded in early October, the Italian authorities allocated 48 MW of solar power capacity and 10 MW of wind power capacity. The auction ceiling price was EUR0.065 per kWh, with developers offering discounts ranging from 2% to ...

of large-scale photovoltaic projects our association's strategic goal is to create a support system for the development of large-scale photovoltaic projects. Partners We are members of

Average winning bids in the auction yesterday (26 October) were COP155.8/kWh (US\$0.0414/kWh), according to Colombia's Ministry of Mines and Energy, which said the 11 PV plants will support 4,800 ...

With affordable solar panels a key to the European Union's energy transition goals, the use of trade measures must be weighed against the bloc's ambitious climate goals, a senior official said ...

The Solar4Kosovo project is expected to cost around EUR64 million. Image: Sonnedix. Kosovo is planning to build a 70MW solar plant, with funding provided by Germany and the European Bank for ...
