In order to ensure the viability of Photovoltaic (PV) systems" installation, several Operation and Maintenance (O& M) strategies are followed, such as preventive, corrective and predictive maintenance.

Operation and maintenance (O& M) has become a standalone segment within the photovoltaic (PV) industry and it is widely acknowledged by all stakeholders that high-quality O& M services mitigate potential risks, improve the levelised cost of electricity and power purchase agreement prices, and positively impact the return on investment.

A question we get asked a lot is, Do Solar PV Panels require maintenance? The answer is yes. In summary, we recommend that the system is: Monitored, Electrically condition tested, Mechanically checked, Visually checked and cleaned at certain intervals depending on the type of system. It is important that a system is periodically maintained. Periodically [...]
