Why should you choose a solar PV mounting supplier?

As a solar PV mounting supplier, we provide you with high-quality solar panel ground mounting systems, including solid brackets and support structures so that you can install solar panels on the ground for reliable solar power generation.

What is a solar mounting system?

Mounting systems represent an integral and key part of photovoltaic plants. Their function is reliable fixing of solar panels on either roofs or ground in the case of ground installations.

Why do you need a solar panel roof mounting system?

We provide high-quality solar panel roof mounting systems to ensure that your solar panels are safely and securely mounted on your roof for reliable, efficient solar power generation while meeting aesthetic and environmental requirements.

Who are solar steel?

Solar Steel are manufacturers of steel modular ballasted support systems for commercial PV and Thermal collector project installations. We supply support systems for Landscape and Portrait installations in any configuration. All of our materials are UK only sourced to provide the highest quality systems along with unbeatable 15 year guarantees.

How to choose a PV mounting system?

The main considerations are day long access to unobstructed sunlight and wire lengths to batteries. Appearance and ease of access for any cleaning etc. should also be considered. PV mounting systems should not adversely affect the weather tightness of the structure to which they are fitted.
