

Road sign solar panels

Marlec's solar powered signage kit gives you the opportunity to have high quality illumination in your sign that is not only cost effective but reliable. Marlec's signage kits have become the ideal choice for businesses that want to attract ...

Most roads in the U.S. are made from asphalt. A solar roadway is any road with solar panel technology attached to its surface, thus producing electricity while supporting the cars and trucks that drive on it. While an exciting and innovative way to generate solar power, solar roadways are far from a realistic, cost-effective energy production method.

But what differentiates this from the Solar LUB is that this latest solar-powered road sign light is perfect for illuminating larger signs; indeed, it can accommodate the requirements of lighting signs up to 1500mm. Our Director of Sales, Steve Keary, says " We are really pleased to launch our latest solar product, the Solar LUB. Not only ...
