

Semi-trailer pulling generator blades

What is a blade lifter?

The blade lifter range with the name BladeMAX. With load capacities of 650, 800 and 1,000 mT, it can move the latest mega wind turbine blades in such a way that they can be transported safely and efficiently in wooded or built-up areas, in mountainous regions or in narrow streets.

Which blade lifter is best?

The BladeMAX1000 with its 1000 mT load capacity is the strongest available on the market of blade lifters! This powerful equipment has two movement axes: rotor blades are raised up to 60° and can also be rotated by 360°. A unique feature of the BladeMAX650 and the BladeMAX800 is its patented tilt kinematics.

Is the VorBlade Trailer Wing TM system CARB compliant?

VorBlade Trailer Wing TM System is CARB compliant & EPA SmartWay certified aerodynamic device.

Texas wind farm and semi-truck blade transport Just outside the small town of Vega and west of Amarillo, an oversized load of a wind turbine blade is carried by a semi-truck which drives past huge, modern, curved bladed, wind turbines turning in high winds on the Wildorado Wind Ranch and on nearby farm lands in Texas. wind turbine blade transport by truck on the highway stock ...

Here's a quick answer to whether you can pull a Gooseneck Trailer with a Semi Truck: A gooseneck trailer can be pulled by a semi truck provided that the gooseneck kingpin and fifth wheel plate are at the correct height. If this is not possible, a ball can be mounted behind the 5th wheel to accommodate the gooseneck hitch. ...

Semi-trailers, lowbeds, flatbeds and turntable trailers from 15 t up to 60 t Semi-trailers, lowbeds, flatbeds and modular vehicles from 20 t up to 500 t Industrial transporters and self-propelled ...

Multitrailers. The Nooteboom MULTITRAILER semi low-loaders are multifunctional. Applications include the transport of excavators, shovels, road construction machinery, vessels, access platforms, crane parts, steel structures, concrete elements and windmill components such as generator housings, tower sections, rotor blades and hubs.

GigaMAX low bed semi-trailer. The GigaMAX low bed semi-trailer is characterised by one or two pendle-axle dolly that is permanently attached to the gooseneck.. This allows for an extremely compact overall towing length with a long loading area at the same time. The integrated pendle-axes increase the payload at the front of the vehicle.

Here at Colorado Standby we offer the best selection of trailer mounted diesel generators. We understand the importance of reliable equipment when you're working out in the field. That's why we only supply the best generators on the market. These generators are sure to get the job done and can be easily attached to a vehicle and towed anywhere.

Wind turbines are massive and must be hauled to assembly sites in multiple loads using specialized trailers. Blade and tower trailers, also sometimes called "Schnabel trailers" or "wind tower trailers," are specially designed to transport wind turbine components including blades, generators, and towers.

Wind turbines contain several thousand components. While most of them can be easily shipped across the country, turbine blades pose a major logistical challenge. Averaging 200-300 feet long, utility-scale turbine blades must be transported individually and in one piece.

VorBlade TM Systems are sets of unique vortex generators designed specifically for heavy vehicles, the only aerodynamic devices on the market which mitigate effectively harmful impacts of crosswinds. The Systems provide the best fuel ...

WingMax is part of the TeleMax flatbed semi-trailer series. Features include an hydraulically lifting and lowering gooseneck (by 1,700 mm) and pendular axles to allow negotiation of obstacles such as roundabouts. ... Sliding load supports for the blade tip frame allow the trailer to be shortened even under load. They help deal with winding ...

With an unrivalled lifting capacity of 30 tons, the turbine blade adapter from Faymonville is designed today for the rotor blade weights of tomorrow. Provides space for sufficient axles to ...

The hydraulically operated gooseneck raises itself by up to 1,700 mm, which enables considerable ground clearance. And the flatbed semi-trailer, which is designed for use ...
