

# Single 275w photovoltaic panel

CNBM Solar photovoltaic (PV) module is designed for large electrical power requirements. It is the optimal choice for both on-grid and off-grid power systems. CNBM Solar panel offers high performance of power per square foot of solar ...

Luxor ECO LINE P60/275W solar panel. The 60-cell module is the large-size all-rounder among the Luxor solar modules. Eco in this case means especially economical: The high wattage makes the module the ideal solution for industrial scale equipments. From the open-field facilities, through the tracking system, to the roof-mounted installation.

We recommend the Blue Sky Energy MPPT 3024 controller when connecting a single panel onto a 12 VDC system, or Blue Sky Energy MPPT 1524iX controller when connecting a single panel onto a 24V system. Other controllers are available when multiple panels or different voltage systems are used.

If you are trying to compare one PV panel to another, it is helpful to understand the key technical parameters - or solar panel specifications - that impact performance. With this in mind, we've taken some extracts from the specification sheet for a standard polycrystalline solar panel (Trina Solar's Honey M Plus + 265-275W range) and highlighted the key parameters.
