A mobile solar generator refers to a portable and versatile energy solution that harnesses solar power for electricity generation. These systems include solar panels for capturing sunlight, energy storage components for holding the generated power, and built-in inverters to convert the stored energy into usable electricity.

For solar charging, you need a special solar adapter cable that some manufacturers include in the solar generator kit. An average solar charging time is around 5 hours, but large generators like the Renogy Lycan 5000 and the Bluetti EP500 have a dual-charging mode which lets you charge from the grid and solar at the same time.

For off-grid work and powering small power tools, look for solar generators with a capacity of 500 Wh or above. While most generators come with USB ports and a 12 V outlet, it's worth looking out for models with a three-pin AC power outlet as well.
