Where can I use solar street lighting in the UK?

With the largest selection of solar street, car park and general area lighting systems in the UK, we have lighting for all applications. Typical applications include streets, roadways, car parks, general outdoor areas, playgrounds, storage yards, footpaths, multi use games areas (MUGA), BMX pump tracks, horse riding arenas and such like.

Why should you invest in streetlights?

If you require a light to illuminate an area or just a light to provide a beacon, then we can help. Investing in streetlights is a way of investing into the future to reduce energy-consumption and subsequently to help offset the carbon footprint by using solar led lights in walkways, car parks, play areas, pathway lighting and roadway illumination.

Can a solar LED light be tailored to meet my requirements?

All of our in-house products can be tailored to meet any prerequisite conditions laid out by local councils or authorities so you can find solar LED lighting that works for your needs.

How do solar powered lights work?

The solar powered lights are sized in such a way that they will charge every day of the year using bespoke crystalline solar panel. Our lights can be affixed to existing posts or new columns in a retro style to provide effective lamp post lights for illuminating locations where power may not be available.
