PPT slide on Solar Energy Storage compiled by Raviyank Patel. ... Storage in fuels Reactant is generated by a photochemical reaction brought about by solar radiation. The battery is charged photochemically and discharged electrically whenever needed. e.g., $\text{AgCl} + \text{photons} \rightarrow \text{Ag} + \frac{1}{2} \text{Cl}_2$ Solar energy could be used by the fermentation of algae for ...

4. Introduction o Solar energy as its name shows the energy of the sun. since the beginning of mankind we have used the energy of the sun to dry clothes and food but it wasn't until 1954 scientists in the United States worked out a way to use the sun to create electricity. o Solar Energy originates with the thermonuclear fusion reactions occurring in the sun.
