Volt Solar System Wiring Diagram. A 12 volt solar system wiring diagram is a visual representation of the electrical connections and components in a solar power system that operates at 12 volts. It shows how different components, such as solar panels, batteries, charge controllers, and inverters, are interconnected to form a functioning system.

I am not sure why you said 2pcs of 120ah12V batteries in series. He needs batteries to supply the 1500w loads for 12hours at night. Basically that is  $1500w * 12 = 18000wh$ . dividing by 50% depth of discharge as you choose flooded, that is  $18000/0.5=36000wh$  or divide by 0.8 if for AGM batteries, that is  $18000/0.8 = 22500wh$ .

Just like architects are responsible for drawing up detailed plans for the structures they design, creating a wiring diagram will allow you to plan your solar systems circuit accordingly.
