

Solar power lamp post installation

How do I install my solar lamp post lights?

There are two easy options for installing your solar lamp post lights. Either mounting into concrete with the included bolts. Or mounting directly into the ground with the optional anchor kit. You can mount any of our lamp posts directly into concrete with the provided anchor bolts.

What are solar lamp post lights?

Solar lamp post lights provide a wide range of benefits over normal lamp posts. The first of these is that installation is made very easy since there is no need to wire the lamp post to your electric utility grid, since electricity is produced on-site.

How do you maintain a solar powered lamp post light?

Maintenance over the years is important but simple, as all you have to do is wipe off occasional dirt to make sure the solar panel receives enough sunlight. Then, all you have to do is to wait for the solar cell to charge, for the night to come, and watch as your solar powered lamp post light turns on and illuminates your yard.

How far apart should solar lamp post lights be placed?

As a general rule, you should place solar lamp post lights light-distance away; that is to say, make sure to place the lights far enough apart that the circles of light do not unnecessarily overlap. To do this, measure the distance between the lamp post and the edge of the light it casts.

Do you need an electrician to install solar lamp posts?

The first of these is that installation is made very easy since there is no need to wire the lamp post to your electric utility grid, since electricity is produced on-site. This means they can be placed anywhere, and you don't need to hire an electrician to install solar lamp posts. They are hands-off and require very little maintenance.

How do I choose a solar post lamp?

Once the post light has been removed, and the pole has been sanded and painted to your preference, choose the right solar post lamp for you that also fits within the pole's diameter. While 3"-diameter lamp posts are a standard size, you can also purchase adapters that will give you more flexibility in choosing a lamp.

Antique style with modern technology: look to this Outsunny solar-powered lamp post. After 6-8 hours charging in the sun, it will provide four hours worth of 6000K bright LED light - creating a safe, lit-up atmosphere to see at night. It won't use electricity, saving you money. Made from aluminium, this lamp is strong: IP44 rated, so it's safe for the outdoors.
