2.4 Power Optimisers (1)Power optimisers are DC to DC converters and if installed at PV modules, they can maximise the electricity output of the PV system by constantly tracking the maximum power point (MPP) of each PV module individually. Power optimisers can also be installed for each PV string or PV array instead of each PV module.

One continuous line drawing of Solar panels with sun. Clean energy and renewable resources in simple linear style. Power station and save ecology concept. Editable stroke. Doodle vector illustration.
