

# Solar storage inverter project financing options in Vietnam 2025

Does Vietnam need a 2025 Solar Plan?

Notably, the 2025 plan mandates that concentrated solar must include storage (minimum 10 percent of capacity, 2-hour duration), a requirement absent in the 2023 version. Vietnam's solar panel trade is regulated under Decree 26/2023/ND-CP, which outlines the Schedule of Export Tariffs and Preferential Import Tariffs.

How is solar energy regulated in Vietnam?

Vietnam's solar power sector is governed by a number of key regulations and policies aimed at promoting the development of renewable energy while managing the challenges associated with rapid growth.

How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

How has the FIT program impacted solar power development in Vietnam?

The FiT program has been a major driver of solar power development in Vietnam, offering a tariff of 9.35 cents per kilowatt-hour (kWh) for projects completed by June 2019. This program led to a surge in solar capacity, reaching 4.46 gigawatts of new installations.

What is the new tariff structure for solar projects in Vietnam?

Under the updated tariff structure, solar projects are now divided into ground-mounted and floating categories, and segmented further by region--North, Central, and South Vietnam. Tariffs are calibrated based on solar resource availability, infrastructure costs, and local electricity demand, with higher rates awarded to projects that integrate ESS.

Why has the Vietnamese government temporarily suspended solar projects?

To address the rapid growth and grid capacity issues, the Vietnamese government has temporarily suspended new approvals for large-scale solar projects. This measure aims to manage the grid's ability to integrate new capacity and transition from the FiT scheme to an auction-based system for project approval and pricing.

With a spirit of collaboration and long-term commitment, Huawei Digital Power proudly participated in Solar & Storage Live Vietnam 2025 (July 9-10, Ho Chi Minh City), ...

Last week, our Managing Director Thomas Jakobsen joined two high-level panels at the annual Solar & Storage Live Vietnam 2025, sharing practical insights into ...

Financing options for solar inverters have evolved significantly as the solar energy market has grown.

# Solar storage inverter project financing options in Vietnam 2025

Financing can include loans, leasing arrangements,

State-owned utilities are investing in utility scale floating solar projects, the government is offering generous incentives for rooftop solar and large energy users are adopting onsite solar at an ...

AHK Vietnam and GIZ are proud to support Solar & Storage Live Vietnam 2025 as official Association Partners. This two-day event convenes 120+ speakers, 250+ exhibitors ...

In May 2024, the upfront cost of installing a solar power system in South Africa would set you back approximately R150,000 to R350,000 for a small project and up to R3.5 million for a 100kW system. The high upfront capital ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, ...

After debt payments have been made, other investors (like equity investors) will be paid. In general, project's assets are used as collateral to the loan. This type of financing is common in renewable energy projects because building solar, ...

The Vietnam rooftop solar sector is set for a major boost with a new draft decree published in early October 2024, introducing fresh policy guidelines to promote self ...

Vietnam's Ministry of Industry and Trade (MOIT) has unveiled a revised feed-in tariff (FIT) framework for solar power, incorporating location-based pricing and, for the first ...

Ho Chi Minh City-based Vietnam and Global Green Power JSC (Green Power) and Chinese giant Huawei have signed an MoU on developing 100 MWp of rooftop solar energy in Vietnam. According to the MoU signed on ...

When integrated with Huawei's smart inverters, energy management systems (EMS), and EV charging infrastructure, the offering reflects a systems- thinking approach, ...

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost. This approach has ...

Solar & Storage Live Vietnam is the country's leading clean energy event and your one-stop shop to take the pulse of one of the world's fastest growing en. Solar & Storage Live Vietnam 2026 is held in (Ho Chi Minh City), Vietnam, ...

Introduction Solar & Storage Live Vietnam 2025 is a partner event supported by GIZ as official Association

# Solar storage inverter project financing options in Vietnam 2025

Partners. This two-day event convenes 120+ speakers, 250+ ...

HO CHI MINH CITY, Vietnam, July 3, 2025 /PRNewswire/ -- Vietnam takes a bold step forward in its clean energy transition as the country's largest renewable energy event, ...

Explore Vietnam's booming solar power industry: growth drivers (FiT), challenges (grid congestion), key policies (PDP8), and solar panel trade regulations.

The "Solar & Storage Live Vietnam" is a prominent international fair taking place at SKY Expo Vietnam in Ho Chi Minh City. It focuses on Solar-PV technologies, energy storage solutions, and related innovative technologies. This event is ...

Event Description Solar & Storage Live Vietnam is the country's largest clean energy event and your one-stop shop to take the pulse of one of the world's fastest growing ...

A few years ago, Vietnam pledged to reach net-zero emissions by 2050 during the COP26 summit in Glasgow. This commitment reflects the country's determination to address climate change and contribute to global ...

GoodWe, a leading provider of solar inverters and energy storage solutions, in addition to the BIPV solutions discussed in the section above, showcased its core expertise of inverters at ...

Vietnam's Ministry of Industry and Trade (MoIT) has proposed significant revisions to the national Power Development Plan (PDP8), emphasizing an increased role for ...

Ingeteam announced the Hawaiian solar + storage project Hale Kuawehi is now operational. The company has completed the commissioning work for the eleven inverter ...

THE FUTURE OF SOLAR AND ENERGY STORAGE IN VIETNAM Solar & Storage Live Vietnam is the country's largest clean energy event and your one-stop shop to take the pulse of one of the world's fastest growing energy ...

Vietnam's solar power sector is governed by a number of key regulations and policies aimed at promoting the development of renewable energy while managing the challenges associated with rapid growth.
