

# Solar support to transform the house

Will installing solar panels on every home raise 43 per cent?

Installing a solar panel system on every home could raise this number to 43 per cent. Under the new Energy Independence Act's Warm Homes Plan, Labour has pledged to invest an extra £6.6 billion (EUR7.7b) over the next five years to upgrade five million homes. This will be used to support insulation, solar panels, batteries and low-carbon heating.

Will solar power help low-income people in the UK?

It will also include installing solar panels on many social housing, helping residents on low-incomes create their own green energy to power their homes. UK Business and Energy Secretary, Kwasi Kwarteng, said:

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.

Are solar panels a good idea for a new build?

Understand the current regulations surrounding solar panels on new builds, and whether they'll change soon. By incorporating solar panels, developers enhance the property's energy performance, and also make it more attractive to eco-conscious buyers looking to save time and effort on forking out the high upfront cost of solar panels.

How many homes in the UK have solar panels?

There are currently around 1.2 million homes with solar panels in the UK, according to the latest MCS installations data. And the numbers aren't showing signs of stopping. So, why are so many people switching to solar energy, and should you be doing it too?

How do solar panels convert sunlight into electricity?

This can be converted into electricity using solar photovoltaic panels, known as 'solar PV', installed on your roof. This electricity can power your home, save you money, and help to decarbonise grid supplied electricity. Solar PV systems - a collection of solar panels - turn sunlight into electricity through the 'solar cells' they contain.

A simple system doesn't involve any re-wiring, and doesn't change any of the wiring to the rest of the house. The solar panels connect into your consumer unit as a new dedicated circuit.

The support for solar panels to become compulsory on new builds is growing. A Censuswide survey in February 2024 showed that 70% of UK adults support mandatory solar panels on newly built homes, and nearly half ...

# Solar support to transform the house

Solar panels can definitely heat a whole house during summer on their own, for instance with a heat pump, but usually not all year round. It'd take a prohibitively expensive solar & battery system to generate and hold ...
