

The landlord wants to install photovoltaic panels

Can landlords install solar panels?

The main barrier to landlords installing solar panels is what's called the 'split incentive', Mr Reddaway said. 'It'll be the tenant who sees the benefit on the electricity bill, whereas the person who pays for the solar system is generally the landlord. So the main question is: What's in it for the landlord?'

Are solar panels a smart investment for landlords?

With the increase in demand for renewable energy and sustainable living, solar panel installations have become a smart investment for landlords. Not only do solar panels offer financial benefits, but they also contribute to a greener future.

Are solar panels a landlord's fixture?

As it is the 'owner' of the solar PV system who benefits from the FITs, the panels must not become a landlord's fixture. The lease should declare that the panels belong to the tenant (and should be removed at the end of the term). What consents are needed?

What should a landlord consider when buying a solar panel system?

Other things that a landlord should consider include checking insurance policies, to ensure that a new solar panel system will be adequately covered. It is advisable to consult with insurance providers to understand the coverage options available and any specific requirements related to solar panels.

Are solar panels a good investment for rental properties?

One of the primary advantages of solar panels is the significant cost savings on electricity bills. By harnessing the power of the sun, rental properties can generate clean and renewable energy, reducing or even eliminating dependence on grid electricity.

What documents should a landlord keep for a solar panel installation?

Landlords should also keep thorough documentation of the solar panel installation, including warranties, service contracts, and maintenance records. These documents are crucial for tracking the system's performance, ensuring compliance with warranties, and providing evidence of regular maintenance and upkeep.

6 ¶ Many solar panel manufacturers provide performance warranties that guarantee a certain level of output after 25 years, which makes sense, since this used to be the rough lifespan of a system. However, solar panel now last ...
