

Total investment cost of business energy storage project in Portugal

How much money will Portugal spend on energy storage projects?

This included six projects from Spain's Iberdrola, which secured nearly EUR 20 million in public funding. Portugal's Ministry of Energy has announced that it has allocated EUR 100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025.

How many energy storage projects will Portugal support in 2025?

Portugal's Ministry of Energy has allocated EUR100 million to support 43 energy storage projects, scheduled for completion by the end of 2025. These projects were selected from 79 applications under the country's Recovery and Resilience Plan (RRP), with eligible projects able to receive up to EUR30 million in funding.

How much will Portugal spend on energy storage & grid flexibility?

The Portuguese Ministry of Energy has allocated EUR99.75 million (\$107.6 million) for grid flexibility and energy storage projects which should be installed by the end of 2025. From ESS News Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production.

What is a joint energy storage project between Portugal and Spain?

Spain Sweden Switzerland RoE. Prime Minister António Costa has announced today a "very important project" between Portugal and Spain for joint energy storage on the Iberian Peninsula, which will allow emergency situations - like the current energy crisis and the drought to be overcome - and which could also encompass storage of lithium.

Is there a BESS project in Portugal?

Grid-scale BESS projects have been relatively limited in Portugal to date, although utility Iberdrola did bring online a huge, 40GWh pumped hydro energy storage (PHES) project there in 2022. This isn't just another summit - it's our biggest and most exhilarating Summit yet!

Why should Spain and Portugal invest in intermittent renewables?

Energy Clean Horizon take a deep dive. Ensuring the reliable integration of intermittent renewables into the grid poses a complex problem worldwide, Spain and Portugal would need to invest in grid infrastructure upgrades, energy storage solutions, and demand-response mechanisms to enhance grid flexibility and stability.
