

Turnkey Solar Panel EPC contract price in

What is a turnkey EPC contract?

The key thing to note is that with a turnkey EPC contract, you can't get just a piece of the package. For example, if you just want to dip your toe into solar to see if it would be a good fit for your business, an EPC contract won't allow you to just purchase an energy assessment or a site survey - you have to buy the entire solar package.

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.

How does an EPC contract work?

Here's how it works: The scope of work for your solar project is laid out in the initial EPC contract, as is the lump sum cost of the project. The contract price includes everything that's needed to design, build, and install your turnkey system.

What is EPC in solar?

Engineering, Procurement & Construction Explained EPC (Engineering, Procurement, and Construction) is a turnkey project delivery model where a single contractor manages all phases of solar development --from initial design and equipment sourcing to final commissioning.

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

Why should you choose total solar for your EPC project?

Total Solar is equally active in the development of EPC projects. We ensure that the solar panel system is designed, inspected, and then constructed so that it can harvest the maximum amount of electricity for the respective application.

We offer turnkey EPC solutions that may also be used for the development of alternative energy sources, such as solar and wind power. Total Solar is equally active in the development of EPC projects.
